Infrastructure

Varshini Garments is a Garments company situated in the south west of tirupur with a variety of knitting gauges and highly skilled staff. We produce high quality men's and women's knitwear using natural fibres combining traditional methods and modern technology. The majority of our production is made using the highest quality yarns from premium European spinners.

Account Section

Administrative accounting, a subset of managerial accounting, involves a formal methodology for gathering, reporting, and evaluating financial data that deals with management planning and control. Administrative accounting duties are often carried out by an administrative accountant who is an employee of the company.

Display Room

A good place to start is to create an ideal shop display, where our goods can be showcased to their best possible greatest potential. We know what kind of retail space you want to purchase.

Fabric Storage

The cotton and silk clothes must be stored in a cool and dark spaces. Insects are attracted towards light. When the clothes need to be stored for longer periods, then make sure to unfold them frequently to avoid creases becoming permanent. Never starch the cotton clothes when they need to be stored.

Cutting Section

Cutting being the first operation of garment manufacturing lays the foundation of quality of the garment to be made. Any imperfection in cutting process can result in non-conformance of the quality standards of all further processes.

Stitching Section

In the textile arts, a stitch is a single turn or loop of thread, or yarn. Stitches are the fundamental elements of sewing, knitting, embroidery, crochet, and needle lace-making, whether by hand or machine. A variety of stitches, each with one or more names, are used for specific purposes.

Checking

Define quality control check points to be used for testing the product quality at any point in the production process. Quality Control Point is a point or stage of manufacturing where it is essential to control (reduce or eliminate) a risk to avoid down-time.

Factory

The materials which are used to make a garment attractive for selling and packing other than fabric and trims is called accessories. The things those are attached to the garments after finishing are termed as accessories in garments manufacturing technology.

Transport

Our company provides free transport services to our labours & staff by pick up and drop them at their Door steps.

Quality

Varshini Garments is a 30 plus years experienced company having seen numerous difficult situations in Production and having provided solutions for the same. During this journey the company has acquired tremendous knowledge in Garment technology and Quality know-how and understood the best practices in the industry. Varshini Garments has a special quality program for babies and infant garments. Most of the orders are made of Organic cotton. The processing is done with OEKO Tex Class I standard dye stuff and so to speak the Formaldehyde level is always with the result of 'not found'. The Needle policy is updated to top industry standard. Each Production floor has one person dedicated for keeping needle accounts. The needle are maintained accurately and with past history. This way the company controls the movement of used and unused needles for a safe and confident Production. The button pull test strength, snap button fixing strength and the safety and protection of babies from rough and sharp areas of the garment is fully taken care off. Every garment is passed through the metal detector machine after the final finishing just before it goes into the carton box. This area is well secured from the entry of unauthorized persons.

Quality Testing

We have excellent in-house lab facility to scrutinize & sustain necessary quality standards in each manufacturing process.

Quality Assurance

Quality Assurance department constantly listen to customers to know their expectations & finding areas for improvement.

Quality Deliverance

We ship the apparels early and we always receive positive feed backs from clients and customers who use our productions.
